

A small, green planet

January 31, 2023 – On Tuesday, our students from classes I – III watched a performance entitled. "Little, green planet", staged by the Artenes Theater from Wrocław in the Leborg Cultural Center. The values passed on to our children during the speech are invaluable – respect for nature, care for order, responsibility for the common good, awareness of the impact on the surrounding environment. It was a smart lesson.

Introduction to the show

Sun, warmth and water are symbols of summer and rest for every child. We associate them with holidays, trips and fun. It turns out, however, that while we can have a lot of sun and heat, it can be difficult with water. Because either there may be too little of it, or while it is still there, it will overgrow with algae or bloom with cyanobacteria, like our beloved Baltic Sea. Although we love the sun, we want the temperature increase not to be associated with biological disadvantages. It would also be nice if, during a holiday bathing in a clean lake, we raced with fish, not with plastic bottles and other garbage.

Fortunately, these are not children's worries, but we must remember that **it is children who will take the world from us** as we leave it to them and do with it what we teach them. So it is worth helping children, even the youngest ones, acquire at least basic knowledge that will **help them keep our homeland in the most beautiful condition.** Homeland – the small one – the place where we live every day, the big one – between the Oder and Bug rivers, and the biggest one – the planet that has been wandering around the sun for billions of years. Because the Earth only seems big to us. And really, it's just a small green planet.

Values promoted by the show

- respect for nature
- attention to order
- responsibility for the common good
- awareness of the impact on the surrounding environment

Screenplay and direction

- Zdzisław Dyrman

Scenography

- Aleksandra Kozel

Educate yourself and others about sustainable practices

Planting trees and volunteering at local tree-planting events are great ways to help the environment.

“ Protecting our planet isn't just an obligation - it's a chance to create a brighter future for everyone! ”
